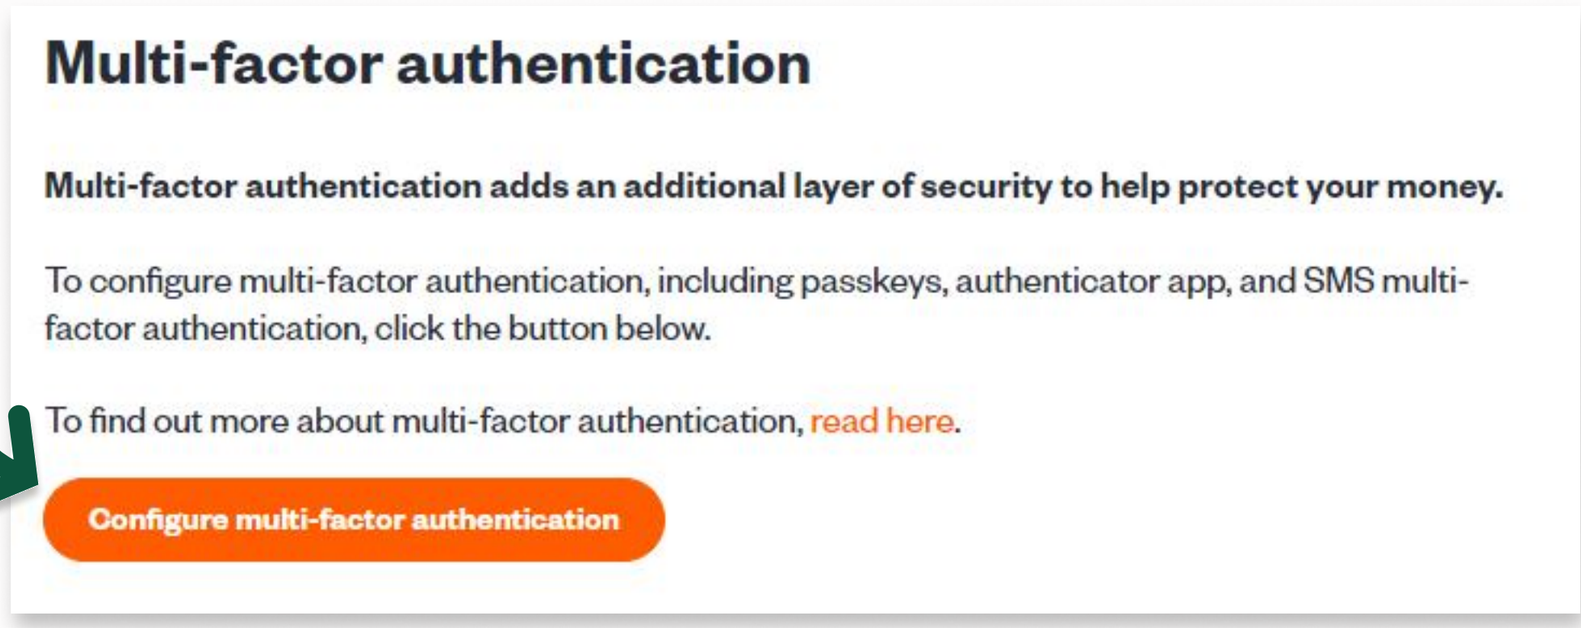
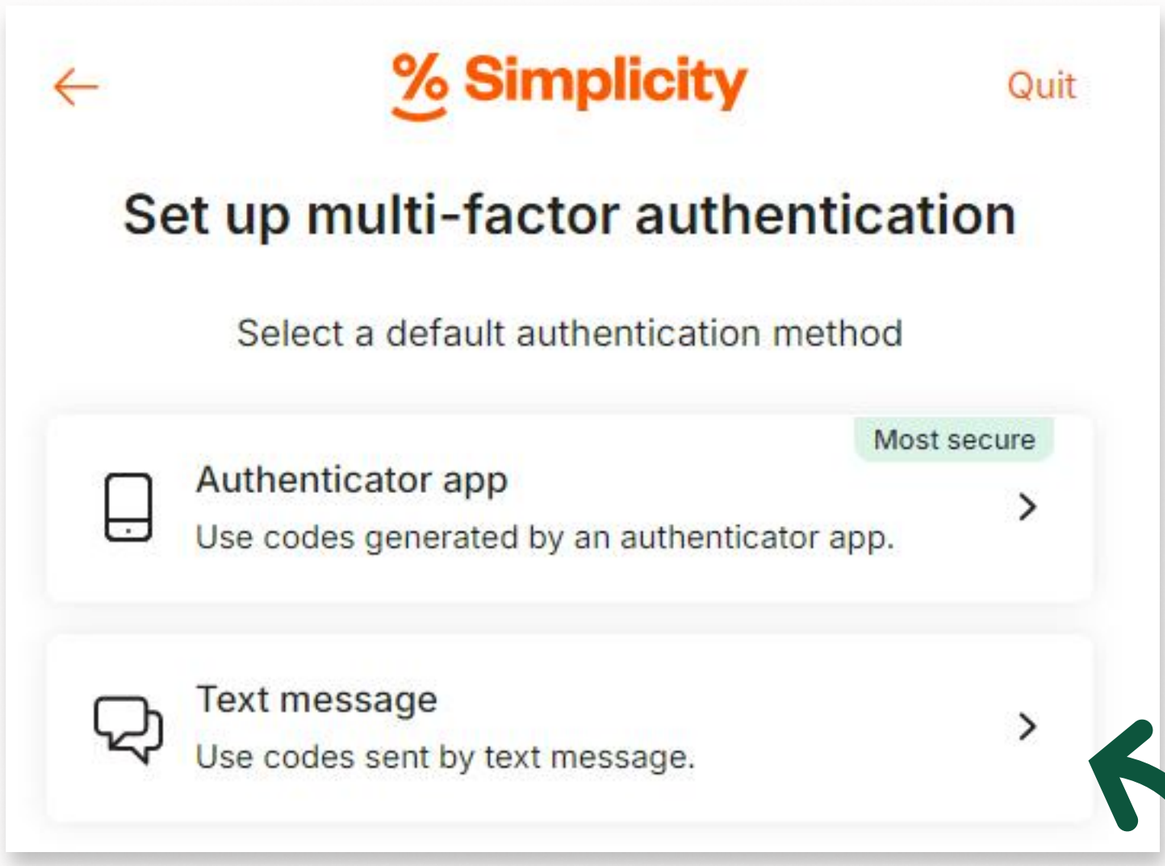
1 Open the Simplicity web app on your computer or another device. Click on Settings.

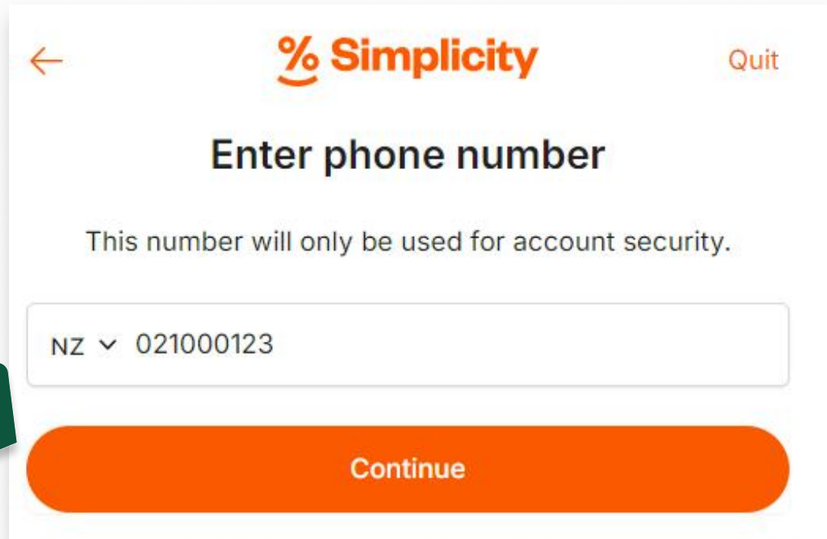
2 Click on Configure multi-factor authentication.



3 Select Text message.

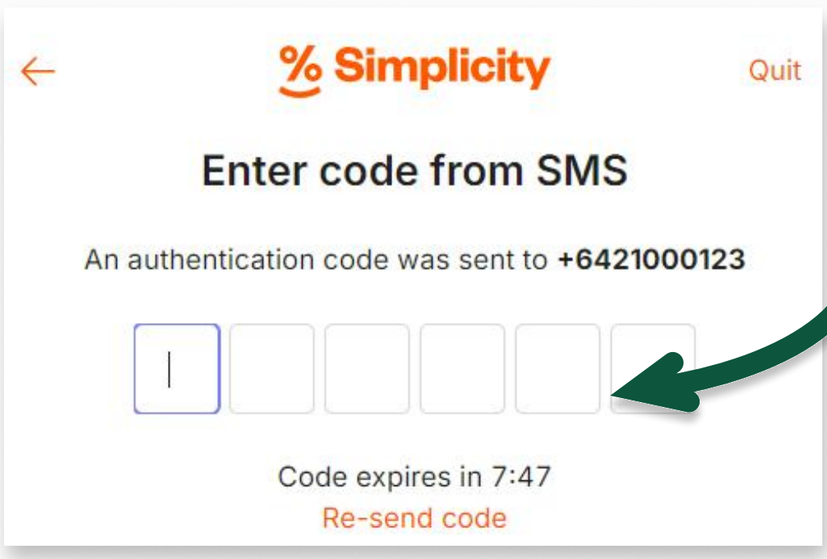


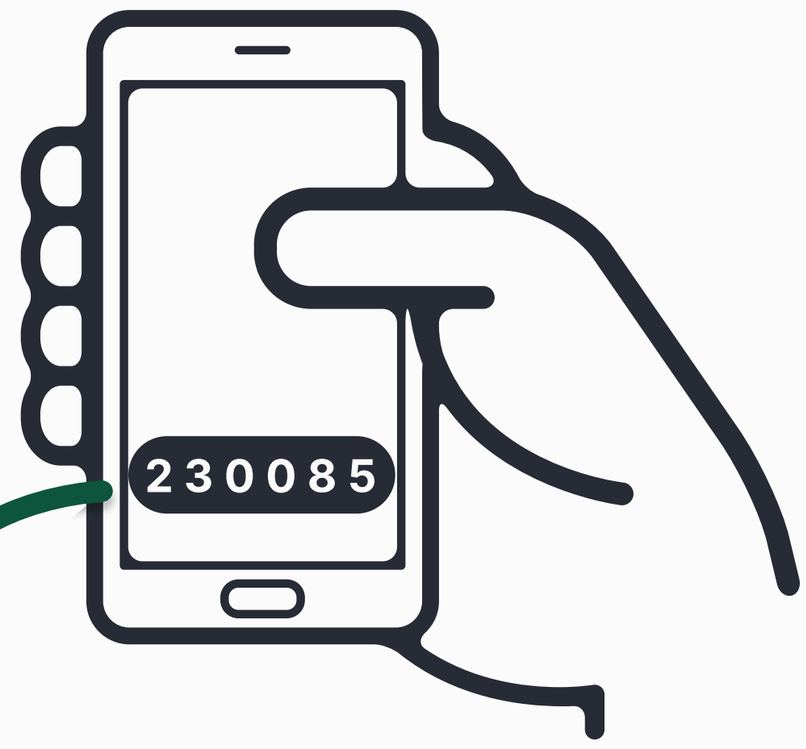
4 Enter your mobile phone number. For overseas numbers select the country code from the dropdown menu and click Continue.



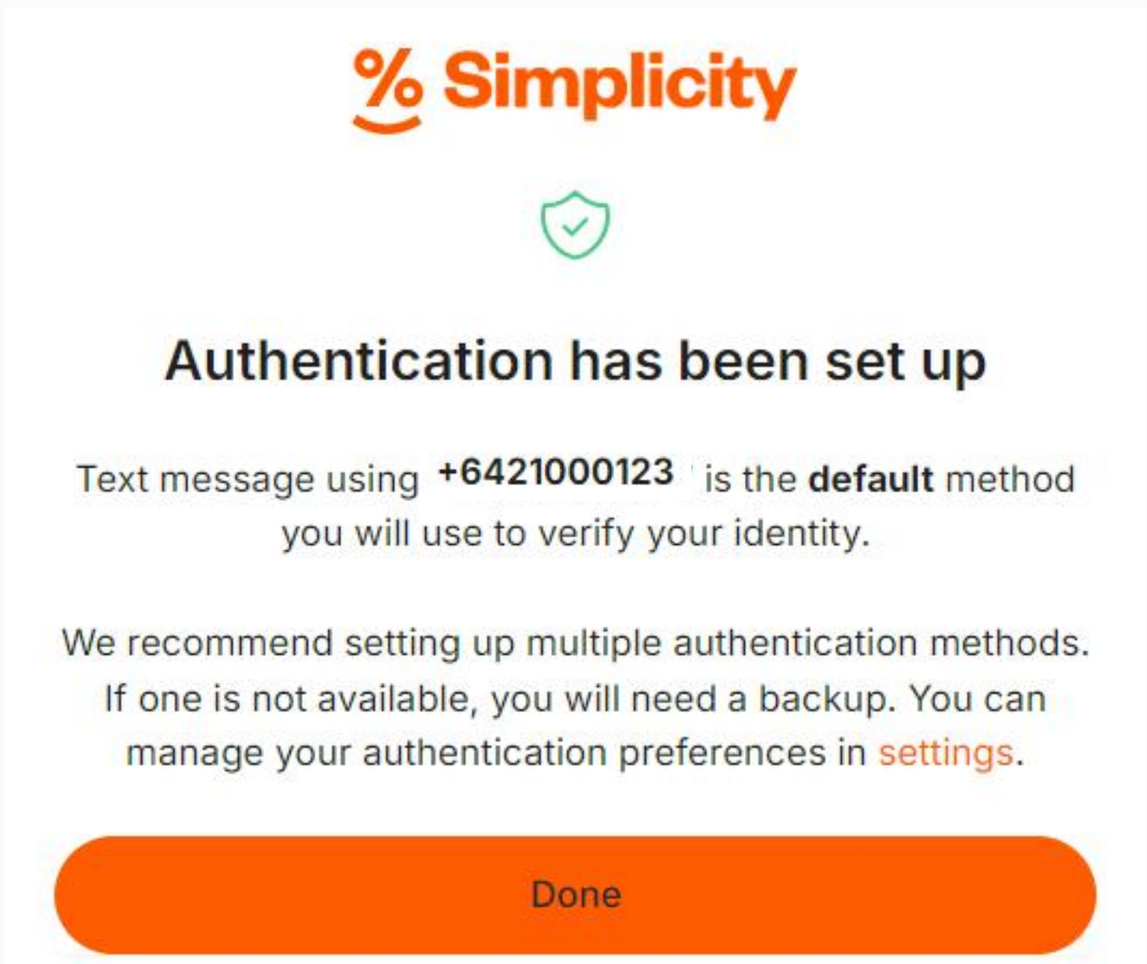
5 Once you receive the SMS/text, enter the six-digit code provided.

Please note: exiting this page before entering the code will invalidate the code you've just been sent.





6 When the code has been entered correctly you 'll see a message confirming your SMS/ Text authentication has been successfully activated.

Click Done to finish the process.


You'll now need to use a text generated code every time you log in to your Simplicity account.
