Open the Simplicity web app on your computer or another device. Click on <u>Settings.</u>

Click on <u>Configure</u> <u>multi-factor</u> <u>authentication</u>.

3

Select Passkey.

Simplicity Settings Accounts

Multi-factor authentication

Multi-factor authentication adds an additional layer of security to help protect your money.

To configure multi-factor authentication, including passkeys, authenticator app, and SMS multifactor authentication, click the button below.

To find out more about multi-factor authentication, read here.

Configure multi-factor authentication

Add more backups			
	Authenticator app Not set up	+	
ුදු	Passkey Not set up	Most secure	

Click on <u>Create</u>.

Your Passkey will be saved to the password manager linked to the email you've logged in with (e.g., janesmith@gmail.com)

Ensure you're using the same password manager account across all devices to access your Passkey.

Create a passkey to sign in to simplicity.kiwi?

Passkey will be saved to your **Password Manager** for **janesmith@email.com**.

After you click on <u>Create</u>, you'll be asked to scan your fingerprint or face.

When completed successfully, you'll see a confirmation message. Click <u>Done</u> to finish the process.

6

Every time you log in to your Simplicity account a message will pop-up and you'll be prompted to either scan your fingerprint or your face.

Authentication has been set up

Passkey is the **default** method you will use to verify identity.

We recommend setting up multiple authentication methods If one is not available, you will need a backup. You ca manage your authentication preferences in settings.
