

Simplicity Investment Funds

Unhedged Global Share Fund

Fund update

This update was first made publicly available on 29 April 2024

Fund update

Quarter ending 31 March 2024

What is the purpose of this update?

This document tells you how the Simplicity Unhedged Global Share Fund (Unhedged Global Share Fund) has performed and what fees were charged. The document will help you to compare the fund with other funds. Simplicity NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Unhedged Global Share Fund invests in shares across developed markets, designed to generate a return similar to the performance of the Bloomberg DM ex NZ ESG Screened Index (unhedged) and to be the unhedged International shares component of a diversified investment portfolio.

Total value of the fund	\$ 1,149,308,249
The date the fund started	28 April 2023

What are the risks of investing?

Risk indicator for the Unhedged Global Share Fund:¹

Risk indicator

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/tools/investor-profiler>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. As the fund has not been in existence for five years, the risk indicator is based on five year information including actual performance figures from 28 April 2023 and market returns data for the period prior to that date. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

PAST YEAR

Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	30.86%

The market index is the Bloomberg DM ex NZ ESG Screened index (unhedged).

Additional information about the market index is available on the Disclose Register:

<http://www.companiesoffice.govt.nz/disclose>

What fees are investors charged?

Investors in the unhedged Global Share Fund are charged fund charges. In the year to 31 March 2024, these were:

Total fund charges (including GST)	0.15%
------------------------------------	-------

Which are made up of

Total management and administration charges	0.15%
---	-------

Including:

Manager's basic fee	0.15%
Other management and administration charges	0.00%
Total performance-based fees	0.00%

Other charges

Dollar amount per investor

Administration Fee	\$0.00
--------------------	--------

Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds).

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term².

Artie had \$10,000 in the fund at the start of May 2023 and did not make any further contributions. At the end of March 2024, Artie received a return after fund charges were deducted of \$2,793 (that is 27.93% of their initial \$10,000). This gives Artie a total return after tax of \$2,633 for the period.

Notes

1. As the fund started on 28 April 2023, actual returns for the fund are not available until then. To calculate the risk indicator for the five-year period ending 31 March 2024, market index returns have been used up to 28 April 2023 with actual fund returns used for the balance of the period. As a result of those market returns, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. As the fund started on 28 April 2023, this calculation is based on the actual return for the period from that date to 31 March 2024, minus the total fund charges and tax for that period.
3. We have no specific target for Australasian equities. Exposure to Australasian equities is included in International equities. We have no target for listed property. Exposures to real estate investment trusts are included in equities.
